*courses yet to be completed

PROJECTS

Todos Application (yharshatodolist.ccbp.tech)

Developed persistent todo application with CRUD operations to track list of tasks

- Displayed list of todos with HTML list elements, styled todo list using CSS, Bootstrap
- Implemented todo crud operations by using JavaScript event listeners and updated UI dynamically by using JavaScript DOM operations.
- Used Arrays, Objects and their methods during todolist CRUD Operations, Persisted todo list state on page reloads using local storage methods.

Technologies used: HTML, CSS, JS, Bootstrap

Wikipedia Search Application(yharshawiki.ccbp.tech)

Developed custom wikipedia search application where user can search and view curated results and can see detailed explanation in wikipedia by clicking on the specific result

- Displayed list of search results with HTML list elements with hyperlink as url, styled list using CSS, Bootstrap and implemented responsiveness using Flex properties and CSS Box model.
- Fetched search results from server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap

API Testing Console (Go REST Console) (yharshaapi.ccbp.tech)

Developed a web console application where users can test an api by giving API, request body and type of network call and can see the API call status and response

- Developed console UI by using html form with input, select elements and styled the form using Bootstrap flex classes and CSS Box model.
- Fetched Data from server asynchronously using fetch GET HTTP API call and displayed response from the API dynamically by using JavaScript DOM operations.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap
